Some Health Department Services Limited

As of November 3, 2015, all public health nurses at Pike County Health Department have temporarily shifted duties to assist with investigation of a food borne outbreak. If services are needed in these public health programs, WIC, family planning, or Immunizations- residents are urged to call the Pike County Health Department - to see if the services are currently available.

When a food borne or communicable disease outbreak occurs, it takes all available resources of a local health department to investigate the illness and determine the causative factors.

Other services, such as those through the Dental Clinic and Home Health are continuing and available.

For more information, call Pike County Health Department at 217-285-4407.
